

# Day 3: Intro to Conditional Statements

## Objective

In this challenge, we learn about conditional statements. Check out the [Tutorial](#) tab for learning materials and an instructional video.

## Task

Given an integer,  $n$ , perform the following conditional actions:

- If  $n$  is odd, print `Weird`
- If  $n$  is even and in the inclusive range of **2** to **5**, print `Not Weird`
- If  $n$  is even and in the inclusive range of **6** to **20**, print `Weird`
- If  $n$  is even and greater than **20**, print `Not Weird`

Complete the stub code provided in your editor to print whether or not  $n$  is weird.

## Input Format

A single line containing a positive integer,  $n$ .

## Constraints

- $1 \leq n \leq 100$

## Output Format

Print `Weird` if the number is weird; otherwise, print `Not Weird`.

## Sample Input 0

```
3
```

## Sample Output 0

```
Weird
```

## Sample Input 1

```
24
```

## Sample Output 1

Not Weird

## Explanation

*Sample Case 0:  $n = 3$*

$n$  is odd and odd numbers are weird, so we print `Weird`.

*Sample Case 1:  $n = 24$*

$n > 20$  and  $n$  is even, so it is not weird. Thus, we print `Not Weird`.
